### **Genteq™ introduces Life-Line™ Capacitor Kit, a time and cost-saving field solution for contractors**

Parallel Capacitance Technology™ combines two proven capacitors to meet ratings requirements, reducing on-truck inventory and eliminating the drive time to pick up parts

FORT WAYNE, IND. – Genteq™, a division of Regal Beloit, has introduced the Life-Line™ Capacitor Kit, an innovative field solution for contractors that reduces truck inventory and eliminates trips to pick up the correct-rated capacitor.

The Life-Line Capacitor Kit consists of a carrying case containing six best-in-class Genteq capacitors, two Life-Line devices, assorted installation brackets and a detailed, easy-to-follow application guide. The Life-Line device's Parallel Capacitance Technology enables contractors to connect two capacitors of different ratings in order to achieve the exact rating needed for the job, providing the lowest cost solution to often-complicated and time-consuming HVACR repairs.

"The Life-line Capacitor Kit will address more than 85 percent of the capacitor replacement situations that contractors will face," said Ryan Johnson, capacitor business leader at Regal Beloit. "This solution costs up to 70 percent less than other universal capacitor replacement systems. That factor, combined with savings in labor and mileage, adds up to a tremendous value for the contractor."

The UL-listed Life-Line spider device is also available as a replacement part, giving contractors the ability to combine two existing capacitors to match the required rating for a job.

To find a Life-Line Capacitor Kit distributor, visit [www.RegalBeloitCapacitors.com](http://www.RegalBeloitCapacitors.com). A training video hosted by the Genteq Master Trainer Christopher Mohalley will be available soon at [www.theDealerToolbox.com](http://www.theDealerToolbox.com).
